## Introduction

Successful business depends on Customer Service. It is essential to understand that every employee is involved in customer service. Everyone in every organization is a customer of some kind. It has been proven that customers would rather switch to another company than tolerate poor service. Research indicates, even if there is no conflict, over 60% of all customers quit dealing with a business because of indifference on the part of some employee.

The ability to interact effectively with customers may be the critical difference between success or failure in our work life. Effective customer service begins with an accurate perception of our own work behavioral style. This report was designed to quantify information on how you see your own behavior in the workplace. That information may then be used for you to learn how others perceive your behavior. This knowledge will assist you in formulating strategies in meeting customer needs.

## Descriptors

Based on your responses, the report has marked those words that describe your personal behavior. They describe how you solve problems and meet challenges, influence people, respond to the pace of the environment and how you respond to rules and procedures set by others.

## The Success Insights® Wheel

The Success Insights® Wheel is a powerful tool popularized in Europe. In addition to the text you have received about your behavioral style, the Wheel adds a visual representation that allows you to:

- View your natural behavioral style (circle).
- View your adapted behavioral style (star).
- Note the degree you are adapting your behavior.
- If you filled out the Work Environment Analysis, view the relationship of your behavior to your job.

Notice on the next page that your Natural style (circle) and your Adapted style (star) are plotted on the Wheel. If they are plotted in different boxes, then you are adapting your behavior. The further the two plotting points are from each other, the more you are adapting your behavior.

If you are part of a group or team who also took the behavioral assessment, it would be advantageous to get together, using each person's Wheel, and make a master Wheel that contains each person's Natural and Adapted style. This allows you to quickly see where conflict can occur. You will also be able to identify where communication, understanding and appreciation can be increased.
